TAKSH VADALIYA

AI Engineer | VoiceAI | Multi-Agent Systems | Business Development

Surat, Gujarat,India | vadaliyataksh06@gmail.com | +91 63537 74726 | linkedin.com/in/taksh-vadaliya-b363ab272
github.com/Taksh-v | solidexposure.com

PROFESSIONAL SUMMARY

AI Engineer and founder building and operating **live production-grade agentic systems** — real-time voice agents publicly accessible at solidexposure.com, multi-agent orchestration, and RAG pipelines — while owning the full commercial cycle of customer discovery, outreach, solution positioning, and closing. Ships end-to-end (architecture · latency tuning · evaluation · deployment) in **Python/FastAPI** and translates live market feedback into product scope and pricing. B.Sc. IT (CGPA 8.5/10); founder of an incubated AI startup (**Assest**). Seeking hybrid AI Engineer / Business Development roles where technical depth and commercial ownership drive measurable outcomes.

TECHNICAL & BUSINESS SKILLS

AI & Agents

Multi-agentsystems, CrewAI, orchestration, tool calling, agent memory, LLM application design, evaluation harnesses

RAG & Data Engineering

RAG architectures,Qdrant, vector search, embeddings, hybrid & graph retrieval, chunking strategies, PostgreSQL

Business

Customer discovery, lead generation, outbound outreach, solution positioning, technical demos, offer design, pricing strategy

Voice AI

Real-time voice pipelines, STT/TTS, turn-taking & latency optimization, interruptible multi-turn conversation, telephony/voice APIs

Engineering

Python, FastAPI, REST APIs, async services, LangChain, Mastra, C, Git, Vercel, production deployment

PROFESSIONAL EXPERIENCE

AI Algo Builder

JUN 2026 – PRESENT

Jainam Broking

- Building the **"Delta" trading algorithm** that combines historical market data, news signals, and candlestick patterns into systematic trading logic.
- Researching, backtesting,anditerating on additional algorithmic trading strategies across changing market conditions.

AI Engineer & Business Development

MARCH - JUN 2026

SolidExposure—LiveAIVoiceAgentPlatform (solidexposure.com) · Remote

- Designed, built, and operate **liveproductionAIvoice-agentsystems** publicly accessible on the internet at solidexposure.com for reception, lead qualification, and workflow automation — full conversational design, STT + LLM + TTS latency optimization, tool execution, and backend integration.
- Owned the complete commercial motion solo: customer discovery, prospect research, lead generation, outbound outreach, pitching, and offer positioning, targeting SMBs where voice AI delivered **clear ROI and payback**.
- Translated live business requirements into AI automation use cases; continuously refined product scope, pricing, and service offerings based on real user feedback and client outcomes from the live platform.
- Built reusable agent templates and evaluation frameworks that accelerated new client deployments from **weeks to days** while maintaining production-grade reliability and natural conversation quality on the live platform.

SELECTED PROJECTS

Assest — Agentic Company Brain

OPEN SOURCE

Python · FastAPI · Qdrant · Graph DB · Mastra

Hybrid vector+graphretrieval with agenticmemory workflows unifying fragmented organizational knowledge into one queryable interface; functional prototype with institutional incubation secured.

AI Voice Agent Platform

LIVE · CLIENT WORK

Python · FastAPI · LLMs · Voice APIs

Real-time voice-agent system live at solidexposure.com — natural, interruptible multi-turn conversation with low-latency **STT + LLM + TTS** loops; reusable templates for reception, lead qualification, and support.

Qual — Finance Analysis RAG

OPEN SOURCE

Python · LangChain · Qdrant · RAG

Modularfinancial-intelligence pipeline covering ingestion, chunking, embeddings, hybrid retrieval, and analysis; 4-metric evaluation framework raised aggregate verification score from ~0.50 baseline.

DDAS — Data Duplication Alert

SYSTEMS PROGRAMMING

C · Custom Hashing

Dataduplicationalert system with custom hashing and optimized deduplication across nested storage trees.

ENTREPRENEURSHIP & RECOGNITION

- **GTUVentures / GujaratFellowship** —Founded Assest as an independent AI startup; secured institutional incubation and advanced prototype to design-partner stage.
- **Devang Mehta Hackathon 2025** — Team lead; designed, engineered, and demoed a complete end-to-end platform under strict competitive time constraints.
- **SmartIndia Hackathon2024**— Qualified for the State Round among teams competing at the national level.

EDUCATION & CERTIFICATIONS

B.Sc. Information Technology — GTU-ITR, Gujarat · **CGPA 8.5 / 10** 2023 – 2026

Certifications Harvard/edX CS50 Python | Anthropic Claude 101 | Mastercard Cybersecurity | Cisco Endpoint Security
